Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art does not teach or show a process for low-temperature fractionation of air comprising introducing a first feed air stream into a distillation column system for nitrogen-oxygen separation; pressurizing an oxygen-rich fraction removed from the distillation column system for nitrogen-oxygen separation in liquid form and introducing the oxygen-rich fraction to a mixing column; introducing a heat transfer medium stream in particular a second feed air stream , into the lower region of the mixing column and bringing the heat transfer medium stream into countercurrent contact with the oxygen-rich fraction; removing a gaseous top product from the upper region of the mixing column; introducing a liquid from the lower or middle region of the mixing column into the distillation column system for nitrogen-oxygen separation; introducing a krypton- and xenon-containing oxygen stream from the distillation column system for nitrogen-oxygen separation into a krypton-xenon enriching column; removing a krypton- and xenon-enriched fraction from the krypton-xenon enriching column; and introducing a gaseous top product from the mixing column into an additional column and removing a krypton- and xenon-depleted top fraction from the upper region of the additional column.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
